

# Project

Teaching and learning will have undergone significant changes by 2030. People teaching at tertiary level need to be prepared for the requirements and needs of the new generations.

The EU-funded project 'Future-proof your classroom – teaching skills 2030' developed an innovative blended learning course that teachers and trainers can access easily and free of charge.

The course comprises eight modules that cover topics which are essential for successful teaching performance now and in future.

# Modules

The eight modules of the course will provide you with the skills necessary for successful teaching in the future:

- Module 1:** The role of teachers in 2030
- Module 2:** Communication in on-campus classes
- Module 3:** Designing on-campus training
- Module 4:** Creation and use of e-learning materials
- Module 5:** Teaching with social networks
- Module 6:** Writing skills for the web
- Module 7:** Teaching in virtual classrooms
- Module 8:** Developing a blended learning course

# cBook & iLab

The blended-learning course is set up in a cBook and an iLab. The cBook (computerBook) is an innovative web-based training programme with interactive exercises.

The iLab (innovationLab) is a two-day on-site training course that is offered in addition to each module, allowing you to try out new approaches, skills and e-technologies.

# Storytelling

The cBook and iLab are based on the concept of storytelling. Each module is integrated into a story with plot points and an arc of suspense.

In other words, the eight modules tell a story of what teaching will be like in the future. You will meet two teachers, Lucia and Marko, who will guide you through your learning experiences in a kind of stage-play.

The course is worth 16 ECTS. You can additionally be awarded 4 ECTS for a Teacher Training Assessment.
